

## System Components Revised Price Pages!

May 2003

Dear Customer:

Enclosed please find new System Components Price Sheets that reflect the price changes that we announced in April. These changes include an increase to our Erico Hanger pricing, a decrease in our Star Piping Cast Iron And Ductile Iron Threaded Products, additions to our Nibco Valve Section including Domestic Trim Valves, and additions to our Flexhead Section covering the most recent changes to their product line. Please take the time to replace these pages in your price books so that you will be current with our pricing and part numbers.

Reliable's goal is to be your one source for all of your fire protection product needs from our own RASCO manufactured products to our complete line of Grooved, Cast and Ductile Iron Threaded Products, CPVC, Steel Pipe, Hangers, Valves, Air Compressors, Electrical Equipment, Fire Department Equipment and other products unique to specific locations. This is our goal and we hope that you will give us the opportunity to show you just how unique our service and commitment is to you and to your company. I think that you will find our service and pricing to be second to none.

We at Reliable would like to again thank you for your continued support of our own manufactured products, as well as our system components product lines.

Sincerely,

Rex Schwendiman  
Vice President, System Components
