New & Exciting Products from Reliable

F1RES44 HSW - Our new Horizontal Sidewall and Recessed residential sprinklers offer the best combinations of flows and pressures in the industry! For 16' x 16' the F1RES44 HSW has 16 gpm. and only 13.3 psi. And it is the only Horizontal Sidewall and Recessed sprinkler to provide 18' x 18' coverage on the market today! It has a K Factor of 4.4. Bulletin # 135.

RFC43 - Available January 2004, the RFC43 RES Concealer is a flat concealed sprinkler that offers the lowest flows and pressures in the industry for a flat plate design. Bulletin # 006.

DH80, SWC, & SWC56 - Now available without slots. Quick Response Concealed sprinklers that can provide protection with one sprinkler. Bulletins # 003, 163, and 168.

HL-14 ESFR - K-14 ESFR using Fusible Link Technology - not glass bulb. cULus Listed and FM Approved. Bulletin # 005.

MBEC-14 HSW - Specially engineered fire sprinklers for pre-engineered metal buildings. Designed to be installed on the piping that is supported by the primary roof beams and not the purlins. Covering up to 175 sq. ft. cULus Listed and FM Approved. Bulletin # 169.

K-22 ESFR - Offers K-25 protection at K-22 flow and pressure requirements. Can require up to 240 gpm less than the K-25. Now cULus Listed and FM Approved. Bulletin # 166.

XL Institutional Sprinklers - Only manufacturer to provide an extended coverage for both sidewall and pendent styles covering 16' x 16'. Uses Belleville Spring closure. cULus Listed and NYC MEA Approved. Bulletin # 113.

F4FR-NF - Our new F4FR-NF Non-Ferrous Concealer is the only sprinkler designed specifically for MRI rooms, swimming pools, and many corrosive environments. cULus Listed. Bulletin # 002.
