

System Components Revised Price Pages!

August 2003

Dear Customer:

Enclosed please find new System Components Price Sheets that reflect increases on **System Sensor Electrical Equipment** of 7% and Antifreeze of 12%. These prices will go into effect on **October 6, 2003**. We regret the need to raise pricing, but do so only as a result of increases that we receive from our manufacturing partners. Please review your requirements for these products and place your orders no later than **September 27th** for shipment on or before **October 3, 2003**. All orders placed and shipped after these dates will be subject to the announced increase.

In addition to the above pricing we have also enclosed price sheets announcing **two new products** to our system components line. Nipple Packs by **Seminole** and Roll Grooving Equipment by **Pace**. With the addition of these new products to our already extensive line of System Components products we feel that now more than ever Reliable is your number one source for all of your fire protection equipment needs from Steel Pipe and CPVC to Screwed Fittings, Valves and Flexible Drop Nipples. Our Regional Warehouses stand ready and willing to provide you the products and the service that your company requires and needs to be successful.

Your business is valuable to us and we thank you for your continued support of our own Reliable Manufactured Products as well as our complete line of System Components Equipment.

Sincerely,

Rex Schwendiman
Vice President, System Components
