

Did you know that Reliable has a complete line of Fire Protection Products for the Residential Housing Market?

August 2006

Dear Valued Customer:

Reliable has a complete line of Fire Protection Products for the Residential Housing Market that are **aesthetically pleasing** and **functional**.

We have Residential sprinklers engineered for the lowest flows to meet the minimum design density of .05 gpm/ft.² with **K Factors of 4.9, 4.4 and 4.3**, according to **NFPA 13D & 13R**.

We even have sprinklers with **K Factors of 5.8 and 5.6** which provide lower pressure demands for .10 densities in **NFPA 13** residential applications.

Our Residential sprinklers come in a **variety of styles** - Pendent, Recessed Pendent, Flat Concealed, Conical Concealed, Horizontal Sidewall, Recessed Horizontal Sidewall, Sidewall Concealed - **and finishes**. Custom finishes can also be done.

Most of Reliable's Residential sprinklers have **sloped ceiling** approval for up to 4/12 and 8/12 pitch.

Sprinklers are just one part of the residential fire sprinkler system. We have **sprinkler accessories** to fill all your residential needs.

For more information on our Residential product line, enclosed is our "Residential Fire Protection by Reliable" brochure with our Technical Bulletins and Ordering Guide.

Thank you again for choosing Reliable - your one source for all your fire protection needs. We look forward to providing you with the latest technology, quality and service.

Sincerely,

Michael R. Fee
