

## Reliable's New Evolution of Residential Sprinklers - RFC49 and F1 RES 76

October 2007

Dear Valued Customer:

You know that Reliable has a complete line of Fire Protection Products for the Residential Housing Market that are aesthetically pleasing and functional. And that our Residential Sprinklers have the best combinations of K factors for NFPA 13 residential application. *But did you know that Reliable has **expanded** its Residential product line with **two new sprinklers**?*

The **RFC49**, Residential Flat Plate Concealed sprinkler, has a K factor of 4.9. The RFC49 provides the best form of fire protection by combining an attractive appearance and 1/2" (13mm) of cover adjustment for ease of installation.

Our new **F1 RES 76** sprinkler has the largest K factor on the market today for NFPA 13 Residential Applications. It's available as a Pendent, Recessed Pendent, and Conical Concealed.

For more information on these two new Residential sprinklers, please refer to -

- Bulletin 006 - RFC49
- Bulletin 135 - F1 RES 76 for .05 Density
- Bulletin 176 - F1 RES 76 for .10 Density

Thank you again for choosing Reliable - your one source for all your fire protection needs. We look forward to providing you with the latest technology, quality and service.

Sincerely,

Michael R. Fee
