.....

N252 EC - New FM Approvals as a Control Mode Specific Application Sprinkler (CMSA) for building height of 30 feet, storage height of 25 feet and building height of 35 feet, storage height of 30 feet. No in-rack sprinklers required with pressures starting at 30 psi for 196 square feet coverage. Bulletins 908 and 008.

F1 RES 30 - Our new F1 RES 30, with a K Factor of 3.0, joins our complete line of Residential sprinklers. Specifically designed to provide low flows that are compatible with typical domestic water meter sizes. Our F1 RES 76 sprinklers have the largest K Factor on the market today. Bulletins 135, 176, 006 and 009.

DDX Valves - Available in a wide range of sizes – 2", 2 1/2", 3", 4" and 6". An 8" version is now available. Our PrePaKs are now manufactured in all sizes of DDX valves. They're 33% smaller in size than the competition and up to 130 lbs. lighter in weight. Bulletins 514, 515, 512, 510, 333, 357 and 733.
