Product Description

Reliable Fire Department Connections provide a means through which supplemental fire protection water supply can be pumped into the sprinkler system, standpipe, or other water-based fire protection systems.

Installation

The Reliable Fire Department Connections and accessories shall be installed in accordance with NFPA 13, “Standard for the Installation of Sprinkler Systems,” as well as the requirements of any authorities having jurisdiction. Verify compatibility of the Fire Department Connections and accessories materials with the water supply and the environment where the valve will be installed prior to installation.

Maintenance

The owner is responsible for maintaining the fire protection system in proper operating condition. Any system maintenance or testing that involves placing a control valve out of service will eliminate the fire protection that is provided by the fire protection system.

The Reliable Fire Department Connections and accessories and associated equipment shall periodically be given a thorough inspection and test. NFPA 25, “Inspection, Testing and Maintenance of Water Based Fire Protection Systems,” provides minimum maintenance requirements.

Guarantee

REL-FDC-425 4” x 2-1/2” x 2-1/2” Straight Single Clapper Two-Way Inlet

Technical Specifications
Pressure Rating:
300 psi (20.7 bar)

Material Specifications
Clapper: C37700 Brass Alloy
O-Ring: EPDM
Hinge Pin: C37700 Brass Alloy
Screw: C46500 Brass Alloy/Type 304 Stainless Steel
Sealing: EPDM
Coupling: C37700 Brass Alloy
Ball Bearing: Type 304 Stainless Steel
Body: C37700 Brass Alloy

Fire Department Connection Accessories

Wall Plates

Used to identify and trim exposed Storz and fire department connections

Materials: Aluminum, Rough Brass
Finish: Aluminum, Rough Brass
Size: 4” IPS, 2-1/2” IPS

2-1/2” Plug and Chain

Plugs and chains are designed to protect female swivel threads on fire department connections. They also prevent the entry of foreign matter and debris. All come with standard lug pins.

Material: Aluminum
Finish: Rough Brass

## Breakable Caps

Breakable caps are designed to protect female FDC inlets with pin lugs. They allow quick access when a hose connection is necessary. The caps are made with scored tabs that allow the fire department to easily remove by striking with a hydrant wrench or similar tool.

- **Material:** Cast aluminum or plastic
- **Color:** Red
- **Size:** 2-1/2"
- **Type:** Pin lug

## 2-1/2" x 1-1/2" Reducer

Used to reduce or change Fire Hose Threads.

- **Material:** Brass* - B16
- **Finish:** Polished Brass
