Reliable Automatic Sprinkler Co., Inc. introduces Model FX Dry Pipe Valve
Reliable® launches line of Differential Dry Pipe Valves

[Liberty, South Carolina, April 2020] Reliable Automatic Sprinkler Co., Inc. announced the introduction of the Model FX Dry Pipe Valve.

The Model FX Dry Pipe Valve is a differential type, externally resettable valve used to control water flow to a sprinkler system subject to temperatures below 40°F (4°C). The valve clapper is held in the set position by pneumatic pressure, which acts on a larger surface area than that of the incoming water pressure. For the valve to open, pneumatic pressure from the system must be released.

“The Model FX is lightweight, compact, and requires no priming water,” commented Cary Webber, Reliable’s Director of Technical Services. “This makes it a snap to install and maintain.”

“The external reset plunger is housed within a protective brass assembly which protects the plunger from damage during shipping, but more importantly, from accidentally resetting the valve prior to draining the system” Webber also noted.

The model FX valve is fully assembled and rigorously tested at Reliable’s Liberty, South Carolina manufacturing facility. It is available pretrimmed, including optional butterfly control valve and/or accelerator. Alarm and high/low air pressure switches are included with pretrimmed FX valves. The single FX valve assembly makes it easy to specify, order and install, which saves valuable time for designers, purchasing managers, and fitters.

The Model FX is available in 2” through 6” sizes, with Groove/Groove, Flange/Groove, and Flange/Flange end connections. For comprehensive product options, approvals and specifications, visit reliablesprinkler.com/fx.

Reliable Model FX Dry Pipe Valve

About Reliable:

Reliable Automatic Sprinkler Co., Inc. is a manufacturer and distributor of fire protection equipment. Reliable manufactures the highest quality and most innovative fire sprinklers, valves and special systems on the market. Reliable also distributes a full line of best-in-class system components. All Reliable products are backed with premier customer service. Reliable's corporate headquarters is located in Elmsford, NY with manufacturing headquarters in Liberty, SC. Regional sales and distribution centers are located throughout the US and around the world.
