INTRODUCING OUR NEW PREMIER PARTNERSHIP

Your choice for pipe joining products: Titus Industrial

For the best service, support, and quality in fire protection pipe connection products, Reliable® offers the Titus line.

Reliable® and Titus offer unmatched value by providing the highest quality pipe connection products. Based on their performance-proven line of 2500 psi couplings and fittings serving the industrial and energy sectors, Supply House Times has recognized Titus as one of the fastest-growing manufacturing and distribution businesses in North America for two consecutive years. Now, Reliable® brings Titus' comprehensive line of products to the fire protection market.

As the North American Premier Partner, Reliable® offers the full Titus fire protection line coast-to-coast at all of our 18 Sales and Distribution Centers.

Reliable & Titus Partnership

Reliable® and Titus share a commitment to quality and service. Together, we stand behind both the product and the customer. Beyond the core product line, our combined engineering teams will transform customer feedback into innovative, labor-saving pipe connection products. Our partnership will improve your competitive advantage by getting you on and off the job - fast.

Quality

Quality Assurance

Located in College Station, Texas, the Titus Engineering and Testing Center maintains a full-time team of seasoned engineers who continuously define, refine, and improve Titus quality standards. Titus operates best-in-class manufacturing facilities designed to meet the highest quality and production standards. Titus' global infrastructure supports in-country quality control and inspection with dedicated employees working in each facility. Every Titus component is sold with a unique serial number and is 100% traceable back to the raw material used in the production cycle.

The Titus line of fire protection products is cULus Listed, and FM Approved for use in systems up to 300 psi pressure.

Proactive Quality Methodology

Designed, implemented, and enforced by Titus engineers, quality controls ensure product integrity and functionality. Driven by multi-point inspections and reporting, the Titus quality program is unparalleled in the industry. Cutting-edge software designed for each manufacturing facility and production process proactively maintains product integrity before, during, and after production runs.

Unmatched Warranties

Industry Leading Warranty

Titus Fire Protection products operate under a 2-year limited warranty when used with other Titus products and installed correctly.

Product Highlights

Grooved Couplings

- Rigid Couplings: 1" – 12"
- Flexible Couplings: 1" – 12"
