

## New 8" DryPaK & 8" PrePaK

December 2015

Dear Valued Customer:

Reliable has enhanced its popular DryPaK and PrePaK Systems by offering this **new, larger size**.

Our **New 8" DryPaK Systems** utilize the DDX-LP Dry Pipe Valve, which is hydraulically operated, differential-type valve for low pressure dry pipe valve systems

- Available sizes: 2" (50mm) through **8" (200mm)**

Our **New 8" PrePaK Systems** utilize the lightweight Model DDX Deluge with galvanized trim

- Two options:
  - **Type D** - Electric Single & Electric/Electric Double Interlock
    - Available sizes: 4" (100mm), 6" (150mm) & **8" (200mm)**
  - **Type F** - Electric/Pneumatic Double Interlock
    - Available sizes: 2" (50mm) through **8" (200mm)**

For more information, please refer to **Bulletins 748, 733, and 747** or contact your local Reliable sales office.

Thank you again for choosing Reliable - your one source for all your fire protection needs.

Sincerely,

Michael R. Fee  
Executive Vice President
