

Concealed Sprinkler Wrench-able Caps

***Simple, effective sprinkler protection
that lowers risk and liability.***

- Provided with Model RFC, G5, and LT56C sprinklers.*
- Using the Model W3 wrench, sprinklers are installed without removing the protective cap.
- Indicator on cap for alignment with nominal finished ceiling location.
- Caps project beyond sprinkler cup and are angled out to help avoid damaging ceiling finish.
- Cap color indicates sprinkler temperature rating.
- Cap can be removed with a standard 1/2" NPT or BSPT threaded adapter on pipe.
- Adhesive backed silicone disk available to create a cover plate installation tool.
