Coverage to 18 ft. x 22 ft. (5.5m x 6.7m), 16 ft. x 24 ft. (4.9m x 7.3m).

Features:
1. Flat cover plate (Solid or Perforated).
2. K-factor of 8.0 (115 metric).
3. Listed as quick-response, extended coverage for Light Hazard occupancies.
4. Sprinkler assembly and cover plate packaged separately.
5. \( \frac{1}{4} \)" (6.3mm) cover plate adjustment.
6. Cover plate available in in a wide variety of colors and finishes.

Approval Organizations
1. Listed for use in Light Hazard occupancies by Underwriters Laboratories Inc. and UL certified for Canada (cULus).

Sprinklers, Automatic and Open
Quick Response Extended Coverage Sprinklers

Product Description
The Reliable Model G6-80 Concealed Quick Response Extended Coverage Horizontal Sidewall Sprinkler is an attractive, concealed sprinkler assembly that utilizes a push-on/pull-off cover plate assembly. The sprinkler assembly is shipped with a protective cap.

The flat cover plate is attached to the skirt using 135°F (57°C) ordinary temperature classification solder. The sprinkler is installed into the sprinkler fitting using the Model G6 Sprinkler Wrench.

When the ambient temperature rises, the solder holding the cover plate melts, allowing the release of this part and thus exposing the sprinkler inside to the rising ambient temperature.

The Model G6-80 utilizes a Quick Response soldered link. Quick-response sprinklers are designed to apply water to a fire sooner than standard-response sprinklers of the same temperature rating.

The Model G6-80 sprinkler is listed for a maximum service pressure of 175 psi (12,0 bar).

Application and Installation
The Model G6-80 sprinkler is intended for installation in light hazard occupancies in accordance with NFPA 13. This sprinkler is especially well-suited for use in non-corrosive environments in student dormitories, hotels, hospitals and care facilities.

Model G6-80 Concealed Horizontal Sidewall sprinklers utilize a sprinkler assembly with spring loaded deployable deflector feature. The assembly is completed by the installation of the attractive, 135°F (57°C) push-on/pull-off cover plate assembly, which provides \( \frac{1}{4} \)" (6.3mm) of adjustment.

Apply a Teflon\textsuperscript{*} - based thread sealant to the sprinkler threads. After a 2.5\( \frac{3}{8} \)" (66.7mm) diameter hole is cut in the wall, the sprinkler is installed and properly oriented with the Model G6 Wrench, as follows:

Do not remove factory installed plastic protective cap since it is sized to fit inside the G6 wrench. Note that the sprinkler can only mate when the sprinkler’s deflector orientation tab (Fig. 1) is aligned with wrench’s key-way. The G6 Wrench has a bubble level pad and TOP to assist the installer in properly orienting the sprinkler. Final leveling can be done after leak proof joint is obtained with a minimum to maximum torque of 14 to 20 ft-lbs (19 to 27 N-m). Do not attempt to compensate for improper rough in dimensions of fitting by over tightening the sprinkler assembly, but readjust the sprinkler fitting instead. Leave the protective cap on to assure sprinkler protection while the wall is plastered, wallpapered or painted.

Concealed cover plate/cup assemblies are listed only for use with specific sprinklers. The use of any other concealed cover plate/cup assembly with the Model G6-80 Horizontal Sidewall Sprinkler or the use of this dedicated concealed cover plate assembly on any sprinkler with which it is not specifically listed will void all guarantees, warranties, listings and approvals.

### Approval Type

Quick Response Extended Coverage - Light Hazard Horizontal Sidewall.
Minimum spacing between sprinklers - 8 feet (2.4m).
Install below smooth, flat, horizontal ceilings only AS DEFINED BY NFPA 13.
**Maintenance**

Model G6-80 Concealed Sprinklers should be inspected and maintained in accordance with NFPA 25. Do not clean sprinklers with soap and water, ammonia or any other cleaning fluids. Remove dust by using a soft brush or gentle vacuuming. Replace any sprinkler or cover plate assembly, which has been painted (other than factory applied) or damaged in any way. A stock of spare sprinkler and cover plate assemblies should be maintained to allow quick replacement of damaged or operated sprinklers. Prior to installation, sprinklers should be maintained in their original cartons and packaging until used to minimize the potential for damage to sprinklers that would cause improper operation or non-operation.

**Model G6-80 Concealed Quick Response Extended Coverage Light Hazard Horizontal Sidewall Sprinkler Specification**

Sprinklers shall be quick-response extended coverage sprinklers that are cULus Listed for use in Light Hazard occupancies. Sprinklers to be of bronze frame construction with brass cover plate and copper alloy retainer flange assembly. Water seal assembly shall consist of a PTFE coated Belleville spring washer and machined brass cup containing no plastic parts. Method of attaching the cover plate to the sprinkler cup shall be a push-on and pull-off design allowing a 1/2” cover plate adjustment. Sprinklers shall have a nominal K-factor of 8.0 (115 metric). Sprinkler temperature rating shall be 165°F (74°C) with a cover plate temperature rating of 135°F (57°C). Sprinklers shall be capable of a maximum coverage area of 16 ft. x 24 ft. (4.9 m x 7.4 m) or 18 ft. x 22 ft (5.5 m x 6.7 m), with a minimum lateral spacing of 8 ft. (2.4 m). Rated working pressure shall be 175 psi (12,0 bar). A plastic protective cap shall be provided and factory installed inside the sprinkler cup to protect the sprinkler from damage, which could occur during construction before the cover plate is installed. Installation threads shall be [1-inch NPT] [ISO 7-R¾]. Cover plate finish: [Chrome] [White] [Custom Color— specify]. Extended Coverage Concealed horizontal sidewall sprinklers shall be Reliable Model G6-80. SIN RA4762 ( Bulletin 047).

**Ordering Information**

Specify:
1. Sprinkler: Model G6-80
2. Cover Plate Type: Solid or Perforated
3. Cover Plate Finish

**Installation Wrench**
Model G6 Sprinkler Wrench

**Installation Aid**

A protective plastic cap is included for use during installation.

(i) Other colors and finishes are available. Consult factory for details.

**Note:** Paint or any other coatings applied over the factory finish will void all approvals and warranties.
Reliable...For Complete Protection

Reliable offers a wide selection of sprinkler components. Following are some of the many precision-made Reliable products that guard life and property from fire around the clock.

- Automatic sprinklers
- Flush automatic sprinklers
- Recessed automatic sprinklers
- Concealed automatic sprinklers
- Adjustable automatic sprinklers
- Dry automatic sprinklers
- Intermediate level sprinklers
- Open sprinklers
- Spray nozzles
- Alarm valves
- Retarding chambers
- Dry pipe valves
- Accelerators for dry pipe valves
- Mechanical sprinkler alarms
- Electrical sprinkler alarm switches
- Water flow detectors
- Deluge valves
- Detector check valves
- Check valves
- Electrical system
- Sprinkler emergency cabinets
- Sprinkler wrenches
- Sprinkler escutcheons and guards
- Inspectors test connections
- Sight drains
- Ball drips and drum drips
- Control valve seals
- Air maintenance devices
- Air compressors
- Pressure gauges
- Identification signs
- Fire department connection

The equipment presented in this bulletin is to be installed in accordance with the latest published Standards of the National Fire Protection Association, Factory Mutual Research Corporation, or other similar organizations and also with the provisions of governmental codes or ordinances whenever applicable. Products manufactured and distributed by Reliable have been protecting life and property for over 90 years, and are installed and serviced by the most highly qualified and reputable sprinkler contractors located throughout the United States, Canada and foreign countries.
