Features

- cULus Listed Residential Sprinklers
- Available in pendant and horizontal sidewall orientations
- Decorative finishes available, including recessed escutcheons and conical concealed cover plates

Product Description

Model F1Res Series sprinklers are residential sprinklers with a 3 mm glass bulb operating element. A variety of K-Factors as well as recessed and conical concealed options are available as detailed in this Bulletin.

The F1Res Series sprinklers are specially engineered for fast thermal response to meet the requirements of UL 1626. They are intended for installation in accordance with NFPA 13, 13R, and 13D.

Application

The Model F1Res Series sprinklers cULus Listed Residential sprinklers are intended for use in accordance with NFPA 13, NFPA 13R, or NFPA 13D. The Model F1Res residential sprinklers are cULus Listed for use in residential occupancies and residential portions of any occupancy, where permitted by NFPA 13, NFPA 13R, or NFPA 13D. For NFPA 13R and NFPA 13D applications, the design flow and pressure shall not be less than the minimum flow and pressure specified in the Listed Design Criteria tables in this Bulletin. For NFPA 13 applications, the design density shall be a minimum of 0.1 gpm/sf (4.1 mm/min), but in no case shall the flow and pressure be less than the minimum flow and pressure specified in the Listed Design Criteria tables in this bulletin. Model F1Res Series sprinklers are listed for use in wet systems only.

**Notes:**

1. For NFPA 13 installations the flow per sprinkler must be the greater of: (1) the flow listed in the table above or (2) the flow required to achieve a minimum design density of 0.1 gpm/sq ft over the design area of the sprinkler.
2. For coverage area dimensions less than those listed above, use the minimum required flow for the next larger max. coverage area listed.

Notes:
1. For NFPA 13 installations the flow per sprinkler must be the greater of: (1) the flow listed in the table above or (2) the flow required to achieve a minimum design density of 0.1 gpm/ft² over the design area of the sprinkler.
2. For coverage area dimensions less than those listed above, use the minimum required flow for the next larger max. coverage area listed.

Model F1Res44 SWC Conical Concealed Horizontal Sidewall Sprinkler and Installation Dimensions

Figure 10

Model F1Res44 SWC Conical Concealed Horizontal Sidewall Sprinkler

Technical Specifications
- **Style:** Conical Concealed Sidewall
- **Threads:** 1/2" NPT or ISO 7-1 R1/2
- **Nominal K-Factor:** 4.4 (63 metric)
- **Max. Working Pressure:** 175 psi (12 bar)

Material Specifications
- **Thermal Sensor:** 3 mm glass-bulb
- **Sprinkler Frame:** Brass Alloy
- **Button:** Copper Alloy
- **Sealing Assembly:** Nickel Alloy with PTFE
- **Load Screw:** Bronze Alloy
- **Deflector:** Bronze Alloy

Finishes
(See Table N)

Temperature Ratings
- 155°F (68°C)
- 175°F (79°C)

Cover Plates
- SWC Conical Concealed Plate
- SWC-2 (Slotted) Conical Concealed Plate

Sprinkler Wrenches
Model GFR2

Notes:
1. Not for installation where the maximum ceiling temperature exceeds 100°F due to cover plate temperature rating.
2. 135°F SWC Conical Concealed Plate for 155°F (68°C) sprinklers
3. 135°F SWC-2 (Slotted) Conical Concealed Plate for 175°F (79°C) sprinklers

2. For coverage area dimensions less than those listed above, use the minimum required flow for the next larger max. coverage area listed.

---

Bulletin 135
October 2019

www.reliablesprinkler.com
Installation

Models F1Res sprinklers are to be installed as shown in this bulletin. Model F1, F2, FV, and FP recessed escutcheons are the only recessed escutcheons to be used with Model F1Res sprinklers. Not all F1Res sprinklers may be used with all recessed escutcheons offered. Confirm listing of escutcheon type for use with individual sprinklers. Use of any other recessed escutcheon will void all approvals and warranties.

For installing Model F1Res sprinklers, use only the Model W2 sprinkler Wrench; for installing Models F1Res Recessed Pendent, Sidewall, Conical Concealed Pendent (CCP), and Sidewall Concealed (SWC and SWC–2) sprinklers use only the Model GFR2 sprinkler wrench. Use of wrenches other than those specified may damage these sprinklers.

Installation of F1Res sprinklers in a wall or ceiling will require a hole diameter of 2-1/4” (57 mm) for F1 or F2 recessed escutcheons; or 2-5/8” (67 mm) for FP recessed escutcheons, CCP, SWC, and SWC–2 cover plates.

Install F1Res HSW sprinklers with a ceiling to deflector distance that complies with the hydraulic design criteria tables in this bulletin. The flow arrow on deflector must point away from near wall and “Top” marking must face the ceiling.

Maintenance

Reliable Model F1Res Sprinklers should be inspected and the sprinkler system maintained in accordance with NFPA 25, 13, 13D, and 13R, as well as the requirements of any Authorities Having Jurisdiction.

Prior to installation, sprinklers should remain in the original cartons and packaging until used. This will minimize the potential for damage to sprinklers that could cause improper operation or non-operation.

Do not clean sprinklers with soap and water, ammonia liquid or any other cleaning fluids. Remove dust by gentle vacuuming without touching the sprinkler.

Replace any sprinkler which has been painted (other than factory applied). Properly installed CCP, SWC, and SWC–2 cover plates will have an air gap that is required for proper operation, do not seal the gap or paint the cover plates.

Notes:
(1) Paint or any other coating applied over the factory finish will void all approvals and warranties.
(2) cULus Listed Corrosion Resistant.
(3) The Model FP escutcheon assembly consists of an unfinished galvanized cup with a finished escutcheon ring.
Replace any sprinkler which has been damaged, where cracks are observed in the glass bulb, or when liquid has been lost from the glass bulb.

A stock of spare sprinklers should be maintained to allow quick replacement of damaged or operated sprinklers. Failure to properly maintain sprinklers may result in inadvertent operation or non-operation during a fire event.

**Listings & Approvals**

Listed by Underwriters Laboratories Inc. and UL Certified for Canada (cULus)

**Guarantee**

For Reliable Automatic Sprinkler Company guarantee, terms, and conditions, visit www.reliablesprinkler.com.

**Patents**

For patents applicable to products contained in this technical bulletin, please visit www.r-s.co

**Ordering Information**

Specify the following when ordering:

- **Sprinkler**
  - Model (See Table A)
  - Temperature Rating
  - Threads (NPT or ISO7-1)
  - Finish (See Table N)

- **Escutcheon or Cover Plate**
  - Model
  - Finish (See Table N)

- **Sprinkler Wrench**
  - Model W2 (Pendent and HSW)
  - GFR2 (Recessed and Concealed)
