Quick Response Commercial
Sprinklers Available:
Model XL Commercial Pendent
(SIN R4514)
Model XL Commercial Horizontal Sidewall
(SIN R4534)

Features
1. Quick response performance.
2. Temperature rating: 165°F (74°C).
3. Commercial applications:
   Light and Ordinary hazard (Per NFPA 13).

Listings & Approvals
1. Listed by Underwriters Laboratories, Inc.
   Certified for Canada (cULus)
2. NYC MEA 258-93-E
3. Loss Prevention Certification Board (LPCB, UK)
   The sprinkler is approved for life safety applications.

Quick Response Sprinklers

U.S. Patent Number 6,554,077

Product Description
The Model XL Commercial is a quick response sprinkler. It is a fusible solder link type automatic sprinkler designed for standard coverage applications. These sprinklers have demonstrated response time in laboratory tests which is five to ten times faster than standard response sprinklers.

The quick response feature enables the Model XL Commercial Sprinklers to apply water to a fire much faster than standard response sprinklers of the same temperature rating.

Modern architectural designs require sprinklers that provide not only the best fire protection, but also an attractive appearance. The Model XL Commercial meets both criteria. The flush style of this sprinkler provides for an aesthetically pleasing installation by concealing the entire sprinkler operating parts with the exception of the heat sensing link. Only when the solder of the sensing link melts does the operating mechanism release, allowing the deflector to be extended for distributing the discharging water. The Model XL Commercial has been designed for use in facilities such as office buildings.

Application and Installation
All Model XL Commercial sprinklers are UL Listed for use with the following types of fire protection systems: wet, dry, or preaction. Care must be exercised that orifice size, temperature rating, and sprinkler spacing are in accordance with this bulletin and the latest published standards of the National Fire Protection Association or the approving Authority Having Jurisdiction. Quick response sprinklers are intended for standard area coverage and standard water densities as specified in NFPA 13. Quick response sprinklers and standard response sprinklers should not be intermixed.
These sprinklers must be installed with a Reliable Model ZX Sprinkler Wrench. Any other type of wrench may damage the sprinkler which is designed to allow wrenching with the shipping cap installed, thereby providing further protection to the sprinkler. Shipping caps should be removed only after walls are finished and when escutcheons are being installed. When Model XL sprinklers are ordered, escutcheons and retaining flanges are included. The Model XL Institutional Escutcheon is the only escutcheon that can be used with this sprinkler. The use of any other escutcheon will void all approvals and negate all warranties. Also, each installed sprinkler must include an escutcheon.

Use care to avoid damaging the sprinklers before, during and after installation. Install them according to Caution Sheet CA-132, and inspect all installed sprinklers to insure that they have not been damaged. Replace all sprinklers which have any sign of damage.

1) Other finishes and colors available on special order. Consult factory for details.
2) Sprinkler components are Bright Chrome only. Link is painted Silver or White.

**Installation Tools**
- Model ZX Pendent or Sidewall Sprinkler Wrench

**Sprinkler Markings**
- On XL Commercial Pendent Sprinkler body:
  
  RASCO XL QR K= 5.6  R4514  Pend

- On XL Commercial HSW Sprinkler deflector:
  
  RASCO XL QR K= 5.6  R4534  HSW

**Maintenance**

Model XL Commercial Sprinklers should be inspected and the sprinkler system maintained in accordance with NFPA 25. Do not clean the sprinklers with soap and water, ammonia or other cleaning fluids. Remove any sprinkler which has been painted (other than factory applied) or damaged in any way. A stock of spare sprinklers must be maintained to allow quick replacement of damaged or operated sprinklers, in accordance with NFPA requirements.

**Ordering information**

Specify:
1. Model Type
2. Escutcheon Type
3. Sprinkler Finish (1)
4. Escutcheon Finish
   
   (Note: Sprinklers and Escutcheon are packaged separately.)

(1) Sprinkler components are Bright Chrome only. Link is painted Silver or White.
Reliable...For Complete Protection

Reliable offers a wide selection of sprinkler components. Following are some of the many precision-made Reliable products that guard life and property from fire around the clock.

- Automatic sprinklers
- Flush automatic sprinklers
- Recessed automatic sprinklers
- Concealed automatic sprinklers
- Adjustable automatic sprinklers
- Dry automatic sprinklers
- Intermediate level sprinklers
- Open sprinklers
- Spray nozzles
- Alarm valves
- Retarding chambers
- Dry pipe valves
- Accelerators for dry pipe valves
- Mechanical sprinkler alarms
- Electrical sprinkler alarm switches
- Water flow detectors
- Deluge valves
- Detector check valves
- Check valves
- Electrical system
- Sprinkler emergency cabinets
- Sprinkler wrenches
- Sprinkler escutcheons and guards
- Inspectors test connections
- Sight drains
- Ball drips and drum drips
- Control valve seals
- Air maintenance devices
- Air compressors
- Pressure gauges
- Identification signs
- Fire department connection

The equipment presented in this bulletin is to be installed in accordance with the latest published Standards of the National Fire Protection Association, Factory Mutual Research Corporation, or other similar organizations and also with the provisions of governmental codes or ordinances whenever applicable.

Products manufactured and distributed by Reliable have been protecting life and property for over 90 years, and are installed and serviced by the most highly qualified and reputable sprinkler contractors located throughout the United States, Canada and foreign countries.
