Model F1FR 300 QREC CCP 300 psi (20,7 bar) Rated Concealed Quick Response Extended Coverage Sprinkler

300 psi (20,7 bar) Rated Concealed Quick Response Extended Coverage Sprinkler to 20' x 20' (6.0m x 6.0m)

Features

1. Quick response performance.
2. Push on, thread off, sturdy convenient cover plate.
3. Factory assembled sprinkler and cup, shipped complete with protective cap.
4. Sprinkler assembly and cover plate separately packaged.
5. Two Versions:
 - 1/2" (13mm) Adjustment
 - 5/16" (8mm) Adjustment
6. Rugged damage resistant assembly. No exposed thermal element.
7. Utilizes the Model F1FR-300 QREC Pendent Sprinkler.
8. Aesthetic ceiling profile.
9. Standard finishes in white painted or chrome plated. Other color-painted and specialty finishes available.

For Model F1FR-300 QREC CCP 1/2" K 5.6 (80) Sprinkler Types refer to Bulletin 030 for technical specifications and approvals.

Product Description

The Reliable Model F1FR-300 QREC Quick Response Extended Coverage Concealed Sprinkler is an attractive, low profile concealed sprinkler assembly. This sprinkler assembly utilizes a Model F1FR-300 QREC pendent sprinkler in a Model CCP cup and push-on thread-off cover plate assembly. The cup is securely factory threaded on the sprinkler's inlet end. The assembly is shipped with a protective cap. The sprinkler and cup are easily installed into the sprinkler fitting using the Model RC1 Sprinkler Wrench. The cover plate assembly is attached to the sprinkler cup using a flexible tooth threaded engagement. The cover plate is attached to the skirt using 135°F (57°C) ordinary temperature classification solder.

When the ceiling temperature rises, the solder holding the cover plate melts, allowing the release of this part and thus exposing the Model F1FR-300 QREC sprinkler inside to the rising ambient temperature.

The Model F1FR-300 QREC automatic sprinkler utilizes a 3.0 mm frangible glass bulb. This sprinkler has demonstrated response times in laboratory tests which are five times faster than standard response sprinklers. This quick response enables the Model F1FR-300 QREC sprinkler to apply water to a fire faster than standard sprinklers of the same temperature rating.

Technical Data:

Nominal Orifice	Thread Size	K Factor		Approval Organizations	Sprinkler Ident. Number (SIN)
		US	Metric		
17/32" (20mm)	3/4" (R3/4)	8.0	115.3	1,2,3	R5942

Thread Size	Model	Temp. Rating		Max. Ceiling Temp.	Bulb Color
		Sprinkler	Cover		
3/4" NPT (R3/4)	F1FR-300 QREC	135°F 57°C	135°F 57°C	100°F 38°C	Orange
3/4" NPT (R3/4)	F1FR-300 QREC	155°F 68°C	135°F 57°C	100°F 38°C	Red

Coverage Area		
Flow Rate gpm (L/m)	Pressure psi (bar)	Max. Enclosure Area Width x Length ft. x ft. (m x m)
	K=8.0 (Metric 115.3)	
26 (98.4)	10.6 (0,7)	16 x 16 (4.9 x 4.9)
33 (125.0)	17.0 (1,2)	18 x 18 (5.5 x 5.5)
40 (151.4)	25.0 (1,7)	20 x 20 ⁽¹⁾ (6.0 x 6.0) ⁽¹⁾

⁽¹⁾ 135°F (57°C) Only

The temperature rating of the sprinkler is identified by the color of the glass bulb.

Application and Installation

Model F1FR-300 QREC Concealed Sprinklers use 135°F (57°C) or 155°F (68°C) Model F1FR-300 QREC Pendent Sprinklers with a threaded Model CCP cup which is factory attached to the sprinkler. The assembly is completed by the installation of the attractive, low profile, 135°F (57°C) rated cover plate assembly. The cover plate and sprinkler cup are joined using a flexible tooth threaded engagement. A choice of two cover plate assemblies provides either 1/2" (13mm) or 5/16" (8mm) of cover adjustment.

Do not install these sprinklers in ceilings which have positive pressure in the space above.

The 3/4" NPT (R3/4) sprinkler cup is factory attached to the Model F1FR QREC Sprinkler. A Teflon*-based thread sealant should be applied to the sprinkler threads only.

After a 25/8 inch (67mm) diameter hole is cut in the ceiling, the sprinkler is easily installed with the Model RC1 Wrench. When installing a sprinkler, the protective cap is removed and the wrench is positioned into the sprinkler/cup assembly until the two wrench faces engage the wrenching flats on the Model F1FR QREC Sprinkler. The sprinkler is then tightened into the pipe fitting. When inserting or removing the wrench from the sprinkler/cup assembly, care should be taken to prevent damage to the sprinkler. **DO NOT WRENCH ON ANY OTHER PART OF THE SPRINKLER.** The cover plate assembly is then pressed into the cup. Final adjustment is made by turning the

* DuPont Registered Trademark.

the ceiling surface. Cover plate removal requires turning in the counter clockwise direction.

After installation, inspect all sprinklers to ensure that there is a gap between the cover plate and ceiling and that the four cup slots are open and free from any air flow impediment to the space above.

Concealed cover plate/cup assemblies are listed only for use with specific sprinklers. The use of any other concealed cover plate/cup assembly with the Model F1FR-300 QREC Pendent Sprinkler or the use of the Model CCP concealed cover plate assembly on any sprinkler with which it is not specifically listed may prevent good fire protection and will void all guarantees, warranties, listings and approvals.

Maintenance

Model F1FR-300 QREC Concealed Sprinklers should be inspected and the sprinkler system maintained in accordance with NFPA 25. Do not clean sprinklers with soap and water, ammonia or any other cleaning fluids. Remove dust by using a soft brush or gentle vacuuming. Remove any sprinkler cover plate assembly which has been painted (other than factory applied) or damaged in any way. A stock of spare sprinklers should be maintained to allow quick replacement of damaged or operated sprinklers. Prior to installation, sprinklers should be maintained in the original cartons and packaging until used to minimize the potential for damage to sprinklers that would cause improper operation or non-operation.

Sprinklers, Automatic and Open. Quick Response Extended Coverage Sprinklers.

Ordering Information

Specify:

- Sprinkler Model: F1FR-300 QREC Pendent 17/32" (20mm) Orifice, 3/4" NPT (R3/4).
- Sprinkler Temp. Rating: 135°F (57°C) ⁽¹⁾ or 155°F (68°C).
- Cover plate Model: CCP
- Cover plate thread size: 3/4" NPT (R3/4).
- Cover plate temp. rating: 135°F (57°C).
- Cover plate adjustment: Either 1/2" (13mm) or 5/16" (8mm) (approximate adjustment).
- Cover plate finish. ⁽¹⁾135°F (57°C) required for 20' x 20' (6.0m x 6.0m).

Installation Wrench

Model RC1 Sprinkler Wrench

Installation Aid

A protective cap is included for use during installation.

Cover Plate Finishes⁽¹⁾

Standard Finishes
