Features
1. Upright and pendent installations.
2. Available as either a standard response Model F156 or quick response Model F1FR56.
3. 1/2” (15 mm) orifice with a 1/2” NPT (R1/2).

Approval Organizations
1. Listed by Underwriters Laboratories, Inc. and Certified for Canada (cULus)
2. Certified by FM Approvals

UL Listing Category
Sprinklers, Automatic and Open (VNIV)

Product Description
The Reliable Models F156 and F1FR56 Intermediate Level Sprinklers include shields which protect the glass bulb from water spray impingement caused by sprinklers located at a higher elevation.

Typical applications are for storage racks which require multi-level sprinklers and beneath open grid catwalks.

Application
Model F156 and F1FR56 Intermediate Level sprinklers are used in fixed fire protection systems: Wet, Dry, Deluge or Preation. Care must be exercised that the orifice size, temperature rating, deflector style and sprinkler type are in accordance with the latest published standards of the National Fire Protection Association or the Authority Having Jurisdiction.

Installation
Model F156 sprinklers are standard response sprinklers and Model F1FR56 are quick response sprinklers. Both types are intended for installation as specified in NFPA 13. Upright sprinklers must be installed with the Model D Sprinkler Wrench specifically designed by Reliable for use with these sprinklers and pendent sprinklers must be installed with the Model GFR2 Sprinkler Wrench specifically designed by Reliable for use with these sprinklers.

Glass bulb sprinklers have orange covers to protect the bulb during the installation process. REMOVE THIS PROTECTION ONLY AFTER THE SYSTEM HAS BEEN HYDROSTATICALLY TESTED. Model D and GFR2 wrenches are designed to install sprinklers when covers are in place.

Maintenance
The Models F156 and F1FR56 Sprinklers should be inspected and the sprinkler system maintained in accordance with NFPA 25. Do not clean sprinklers with soap and water, ammonia or any other cleaning fluid. Remove dust by using a soft brush or gentle vacuuming. Remove any sprinkler which has been painted (other than factory applied) or damaged in any way. A stock of spare sprinklers should be maintained to allow quick replacement of damaged or operated sprinklers. Prior to installation, sprinklers should be maintained in the original cartons and packaging until used to minimize the potential for damage to sprinklers that would cause improper or non-operation.

### Ordering Information

**Specify:**
1. Sprinkler Model
2. Sprinkler Type
3. Orifice Size
4. Temperature Rating
5. Sprinkler Finish

### Installation Wrenches

Upright — Model D Sprinkler Wrench
Pendent — Model GFR2 Sprinkler Wrench

<sup>(1)</sup> Other colors and finishes are available. Consult factory for details.

<sup>(2)</sup> Model F156 Standard Response only.

<sup>(3)</sup> 55 °F (68 °C), 175 °F (79 °C), 200 °F (93 °C) and 286 °F (141 °C) temperature ratings only.

<sup>(4)</sup> Only the sprinkler is wax coated, lead or Electroless Nickel PTFE (Teflon®)* plated. The shield finish remains galvanized zinc.

<sup>(5)</sup> cULus listed Corrosion Resistant.

**Note:** Paint or any other coating applied over the factory finish will void approvals and warranties.

### Shields

Galvanized Zinc
Reliable... For Complete Protection

Reliable offers a wide selection of sprinkler components. Following are some of the many precision-made Reliable products that guard life and property from fire around the clock.

- Automatic sprinklers
- Flush automatic sprinklers
- Recessed automatic sprinklers
- Concealed automatic sprinklers
- Adjustable automatic sprinklers
- Dry automatic sprinklers
- Intermediate level sprinklers
- Open sprinklers
- Spray nozzles
- Alarm valves
- Retarding chambers
- Dry pipe valves
- Accelerators for dry pipe valves
- Mechanical sprinkler alarms
- Electrical sprinkler alarm switches
- Water flow detectors
- Deluge valves
- Detector check valves
- Check valves
- Electrical system
- Sprinkler emergency cabinets
- Sprinkler wipers
- Sprinkler escutcheons and guards
- Inspectors test connections
- Sight drains
- Ball drips and drum drips
- Control valve seals
- Air maintenance devices
- Air compressors
- Pressure gauges
- Identification signs
- Fire department connection

The equipment presented in this bulletin is to be installed in accordance with the latest published Standards of the National Fire Protection Association, Factory Mutual Research Corporation, or other similar organizations and also with the provisions of governmental codes or ordinances whenever applicable. Products manufactured and distributed by Reliable have been protecting life and property for over 90 years, and are installed and serviced by the most highly qualified and reputable sprinkler contractors located throughout the United States, Canada and foreign countries.
